## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 thru 9, 11 thru 15, 19 thru 46, and 59 thru 61, drawn to semiconductor device, classified in class 257, subclass 228.
  - II. Claims 10, 16 thru 18, and 47 thru 58, drawn to method of making a semiconductor device, classified in class 438, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as the product made and the process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. For example, as an alternative to the methods set forth in claims 10, 16-18, and 47-58, instead of using a thinning step, one could form a semiconductor base without thinning.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. If Group I is elected, a further restriction is required.

This application contains claims directed to the following patentably distinct species of the claimed invention.

- I. Embodiment I (FIG. 1)

- II. Embodiment II (FIG. 11)
- III. Embodiment III (FIG. 13)
- IV. Embodiment IV (FIG. 24)
- V. Embodiment V (FIG. 26)
- VI. Embodiment VI (FIG. 28)
- VII. Embodiment VII (FIG. 29)
- VIII. Embodiment VIII (FIG. 30)
- IX. Embodiment IX (FIG. 32)
- X. Embodiment X (FIG. 33)
- XI. Embodiment XI (FIG. 37)
- XII. Embodiment XII (FIG. 42)
- XIII. Embodiment XIII (FIG. 45)
- XIV. Embodiment XIV (FIG. 47)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
